DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 30, 2003 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 2, 3, and 20-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 20 recites "wherein said hydrogel particles exclude polymer(s) which modify the gel strength of said hydrogel particles". Although applicants assert that the negative proviso is supported by the disclosure in the specification on p. 5, line 20 – p. 6, line 9, examiner respectfully disagrees.

Art Unit: 1617

If alternative elements are positively recited in the specification, they may be explicitly excluded in the claims. See In re Johnson, 558 F.2d 1008, 1019, 194 USPQ 187, 196 (CCPA 1977) (“[the] specification, having described the whole, necessarily described the part remaining.”). See also Ex parte Grasselli, 231 USPQ 393 (Bd. App. 1983), *aff’d mem.*, 738 F.2d 453 (Fed. Cir. 1984). The mere absence of a positive recitation is not basis for an exclusion. See MPEP § 2173.04(h).

In this case, examiner views that there is no disclosure of the polymers which applicants seek to exclude in the present claim 20. The specification merely discloses the polymer materials which may be used to form “non-crosslinked hydrogel”, but does not positively recite the polymer(s) which modify the gel strength of said hydrogel particles. Examiner takes the position that the new limitation in claim 20 lacks written support from the original disclosure and thus should be treated as a new matter.

Remaining claims are rejected as depending on the base claim which is not supported by the original disclosure.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term “macromolecular dispersing agent” and “macromolecular emulsifying agent” render claim 22 vague and indefinite, since there is no explanation or definition

Art Unit: 1617

of what these agents are. The metes and bounds of the scope of the claim are not clear.

Conclusion

No claims are allowed.
